

# ShimmerScreen®

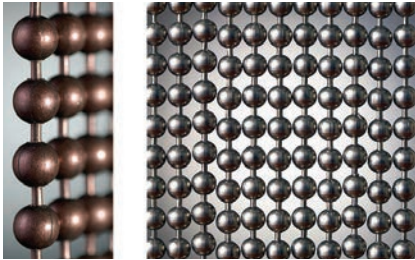

## Decorative Ball Chain Curtain

Hunter Douglas Hospitality is proud to serve as the exclusive distributor of Ball Chain's ShimmerScreen® decorative metal ball chain curtains for the U.S. hotel and hospitality market. A favorite of the architectural and design world since it was introduced in 2002, ShimmerScreen's revolutionary style and functionality make it a perfect addition to Hunter Douglas Hospitality's product offering. Custom fitted according to individual specifications and available in a variety of finishes, shapes, sizes, and colors, ShimmerScreen can be utilized to create stationary room dividers, area separators, partitions, window treatments, modern curtains, and more.

# ShimmerScreen®

## Decorative Ball Chain Curtain

With eleven unique finishes, custom colors, and three bead styles, ShimmerScreen offers endless design possibilities. The standard base material used for the beads is carbon steel, with the exception of the Aluminum and Stainless Steel finishes that use their respective metal as a base. Brass, which does not rust, can be used as a base material if the finish is requested for an indoor area with high moisture content. Stainless Steel is the only material recommended for outdoor use and is a good option for areas with high moisture such as salons and spas.

### FINISHES

All track options are made with 1/8" aluminum. Curved tracks can have a minimum diameter of 12". ShimmerScreen can weigh between 1.5 - 4 lbs per square foot depending on the diameter and material. Suitable support must be in place prior to installation, please contact us or visit [HDhospitality.com](http://HDhospitality.com) to confirm the weight of your ShimmerScreen project.

### CARE AND CLEANING

The chain can be dry-dusted as necessary. Should further polishing be required, a dry polishing cloth is recommended. Before using any liquids or cleaners please refer to the detailed cleaning instructions at [HDhospitality.com](http://HDhospitality.com)
