Fabrication and Installation Capabilities

An experienced team of project managers and fabrication specialists ensure the highest standards for technical design, support, manufacturing, and service. We have over 100,000 square feet of manufacturing space and a full complement of cutting tables and sewing equipment, giving us capacity to meet the needs of even the largest clients. Our nationwide distribution centers and international presence allow us to fulfill orders around the world.

Hunter Douglas Hospitality offers a wide range of custom fabricated items:

- Manual and motorized drapery, sheers, and roman shades
- Manual and motorized roller shades, wood blinds, and various other window coverings
- Complete top-of-bed offerings: bedspreads, coverlets, duvets, pillow shams, bed skirts, and bed scarves
- Throw pillows and bolsters

Decades of experience allow us to focus on custom designed applications, working with clients to deliver non-standard solutions of every type:

- Specialized drapery solutions to fit unusual spaces
- Light filtering and blackout options for all window coverings including roman shades
- Custom items including valances and canopies for the bed and ceiling
- Fabrication with all types of materials; from light, delicate fabrics to the heaviest textiles

From project design to final installation, Hunter Douglas Hospitality provides the most complete range of on-site and remote assistance available including:

- Field measurement
- Technical design consultation
- Professional installation of all Hunter Douglas Hospitality products
- Solving field challenges
- Adjustments and repairs
- Product warranties and a one-year warranty on labor and workmanship

Drapery Specifications

Drapery Specifications

This section describes the components, fabrication process, and other elements of the drapery solutions we provide.

Our drapery capabilities include but are not limited to the following:

- Pleated, Roll Pleat, Rod-Top, Grommeted, and Specialty Drapery
- Manual and Motorized
- Valances and Cornices

Our drapery fabrication team consistently delivers the best, most responsive service in the industry. We will fit challenging windows, work with non-standard fabrics, and meet aggressive budgets and deadlines. All work is performed to meet the following requirements:

- Drapery fabricated to specification within 0.5" of length and 1" of width
- Fabric pattern is matched according to commercial standards
- Multiple width drapery is overlock stitched with half-widths placed on the return side of the drapery
- Side hems are 1.5", double turned and blind stitched (except blackout fabric, which is single stitched)
- Drapery linings are joined by overlocking and are serged at the bottom with an overlock machine.
Linings are placed 0.75" above the bottom of the drapery
- Available in center and off-center open, left-draw, or right-draw

NOTE

- All specified fabrics must meet NFPA 701 fire rating requirements
- Hunter Douglas Hospitality uses customer's own material (COM) except for specified brand standards

GIADA'S, The Cromwell, Las Vegas, NV

Standard Drapery Options

A summary of our standard options is below. Additional options are available upon request.

STYLES

- Pinch Pleat (French Pleat or Parisian Pleat)
- Roll Pleat (Ripplefold®)

TYPES

- Lined
- Interlined
- Unlined
- Blackout (2-Pass and 3-Pass)
- Sheer

DRAW TYPES

- Center Open
- Off-Center Open (one panel is wider than the other)
- One-Way Draw (left or right)
- Stationary

HARDWARE

- Cord Draw - can be specified with tension pulley to hold down cord for safety issues
- Hand Draw - no baton or cord is used and drapery is drawn by hand making this application excellent for healthcare facilities
- Baton and ADA Baton - available in 36", 48", and 60" lengths
- Motorized Mechanism and Carriers - supplied per client specification
- Drapery Tracks - supplied per client specifications and composed of extruded aluminum finished with white PPC (standard)

FULLNESS

- Pinch Pleat - 200%, 250%, or 300% (custom fullness specification also available)
- Roll Pleat (Ripplefold®) - 160%, 180%, 200%, or 220%

LINING

- 2-Pass Blackout - Grey/Ecru and Grey/White
- 3-Pass Blackout - White/White, White/Ecru, Ivory/White, and Ivory/Ecru
- Cotton Polyester - White or Ivory
- Interlining (Flannel) - White

NOTE

- Lining is recommended for all non sheer fabrics (unlined drapery is available upon request)
- Blackout lining is dry clean only and cannot be laundered

ADDITIONAL OPTIONS

- Shot Tape composed of continuous lead rope (frequently specified for sheers to ensure fabric hangs straight)
- Accent Bands

Pinch Pleat

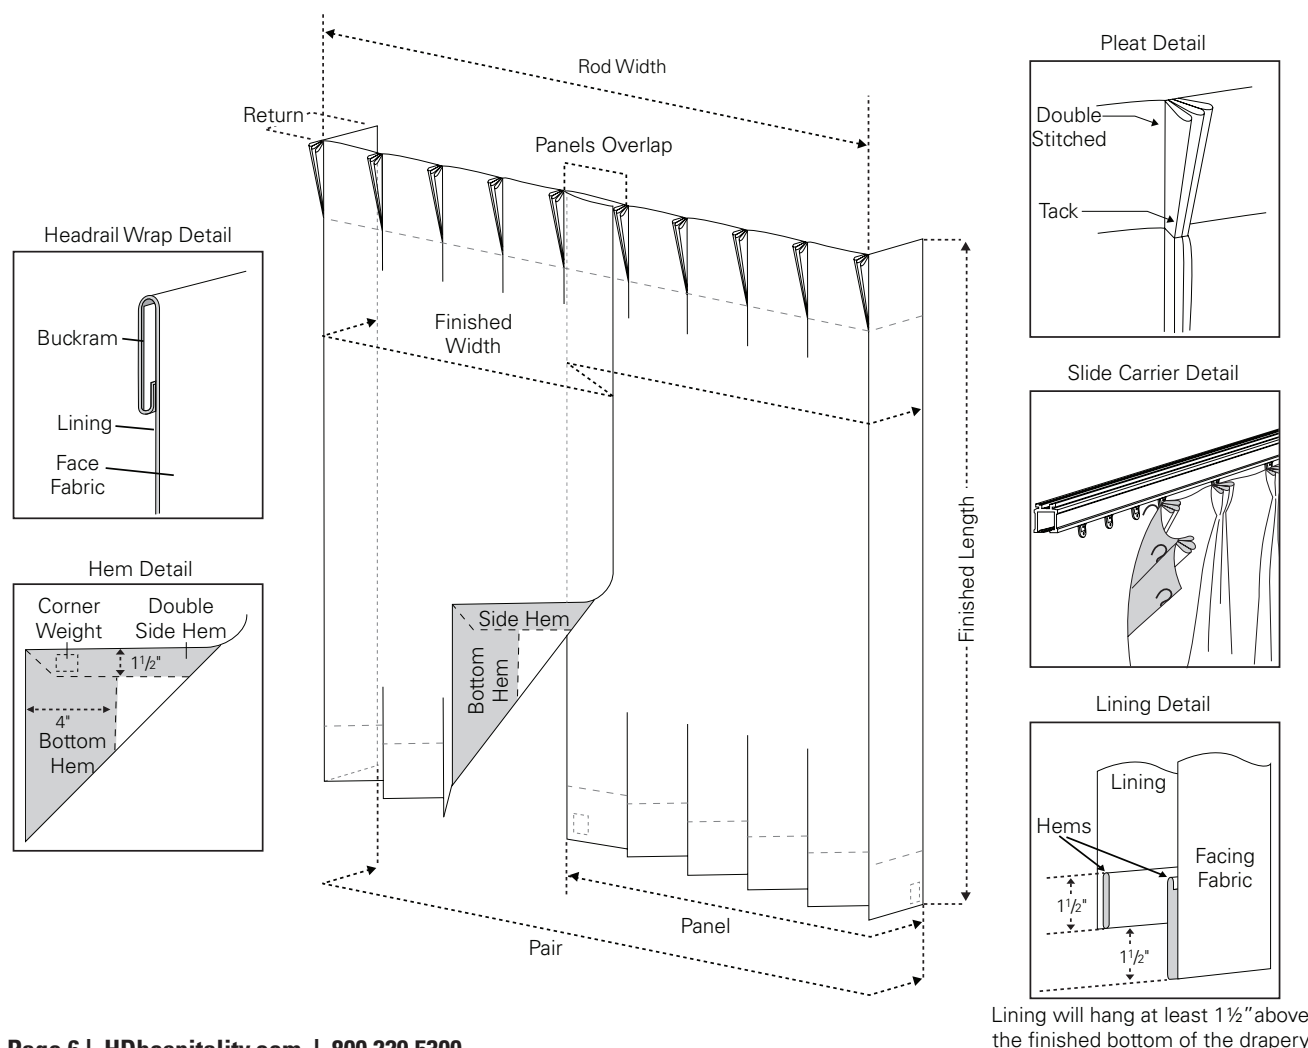

Pinch Pleat drapery treatment provides the best solution for guest rooms and other areas where blackout is desirable.

FABRICATION DETAILS

- Slide carriers - attached with slip-in or pin-on hooks
- Headings - 4" wide buckram folded into fabric prior to stitching (can be suspended under the track or over the face of the track)
- Three-finger pinch pleats spaced approximately 3" to 5" apart
- Fullness options - 200%, 250% or 300% (fullness is typically 200-250%)
- Selvage edges - removed or clipped before fabrication as necessary
- Multiple widths joined using overlapped serged seams and safety stitch
- Hems
 - Bottom: 4" double-folded
 - Side: 1.5" double-turned folds
 - 0.25 oz. corner square lead weight
 - Blind stitched using thread to complement fabric color (blackout is single stitched)

NOTE

- All specified fabrics must meet NFPA 701 fire rating requirements
- Hunter Douglas Hospitality uses COM except for specified brand standards

Ripplefold®

Roll Pleat (brand name Ripplefold®) drapery fabrication attaches the panels to the track with snap tape. This offers a good solution for spaces where the drapery may need to be cleaned regularly, such as healthcare. This style produces an elegant set of smooth, regular curves from both sides, may use less fabric, and take less stack back space than pinch pleat drapery.

FABRICATION DETAILS

- Manufactured to Kirsch fabrication specification chart using 4.25" snap tape spacing
- Hemmed flat panels
- Fullness - determined by the spacing of the carriers, 200% standard
 - 160%, 180% or 220% upon request
- Selvage edges are removed or clipped before fabrication as necessary
- Multiple widths joined using overlapped serged seams and safety stitch
- Hems
 - Bottom: 4" double-folded
 - Side: 1.5" double-turned folds
 - 0.25 oz. corner square lead weight
 - Blind stitched using thread to complement fabric color (blackout is single stitched)
 - Standard hem allowance is double-turn at top and bottom, approximately 12"

NOTE

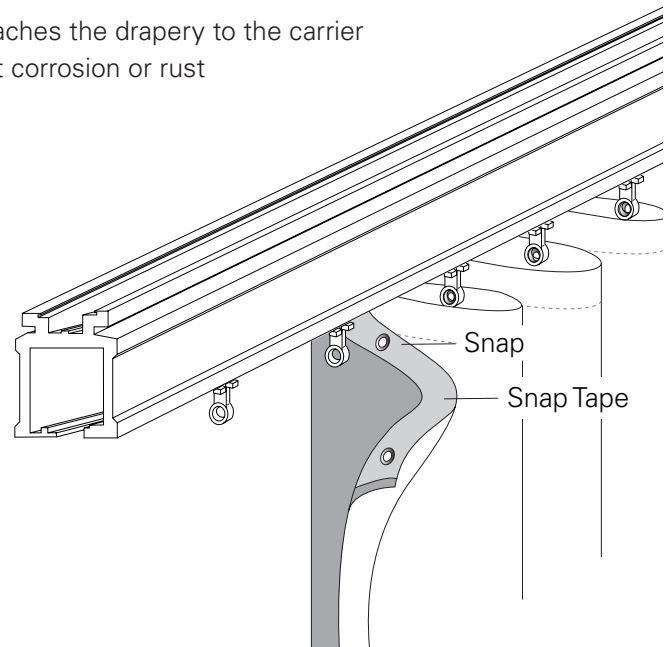

- Roll Pleat drapery hangs slightly below the hardware and thus does not provide complete blackout
- All specified fabrics must meet NFPA 701 fire rating requirements
- Hunter Douglas Hospitality uses COM except for specified brand standards

SIZING

- Order drapery as rod width x finished length

SNAPS

- Snap tape (sewn into the top hem of the panel) attaches the drapery to the carrier
- Snaps are composed of nickel plated brass to resist corrosion or rust

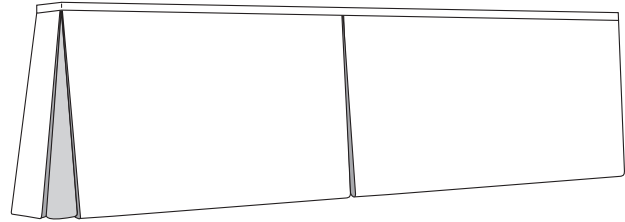

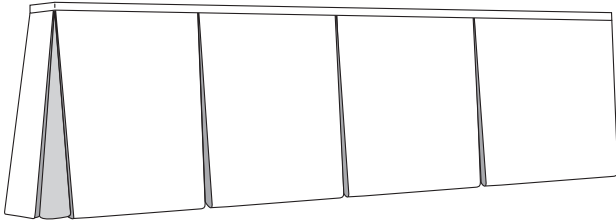

Valance

We offer a wide range of top treatments that bring focus to the window design, as well as conceal window covering hardware to create a finished look.

Valance Styles

- **Box Pleat Valance:** A double pleat, with the material folded under at each side; pleats are generally spaced 4" to 6" apart
- **Tailored Valance:** Version of box pleat with minimal pleats; one to two pleats are created depending on the width of the window

FABRICATION DETAILS

- Lined with FR white lining fabric
- Ceiling mounted valances use 1" x 2" wood frame
- Wall mounted valances typically fit into a header specified by the designer

NOTE

- All specified fabrics must meet NFPA 701 fire rating requirements
- Hunter Douglas Hospitality uses COM except for specified brand standards

SIZING

- Standard outside mounted valances will be fabricated to a width 1" wider (inside dimension) than the drapery track size
- Returns
 - Typically 9" for two treatments at the window (sheer+drapery)
 - Typically 11" for three treatments (sheer+drapery+side panels)
 - May vary per project, please specify
- Height of a valance - typically 14" to 16", please specify per project

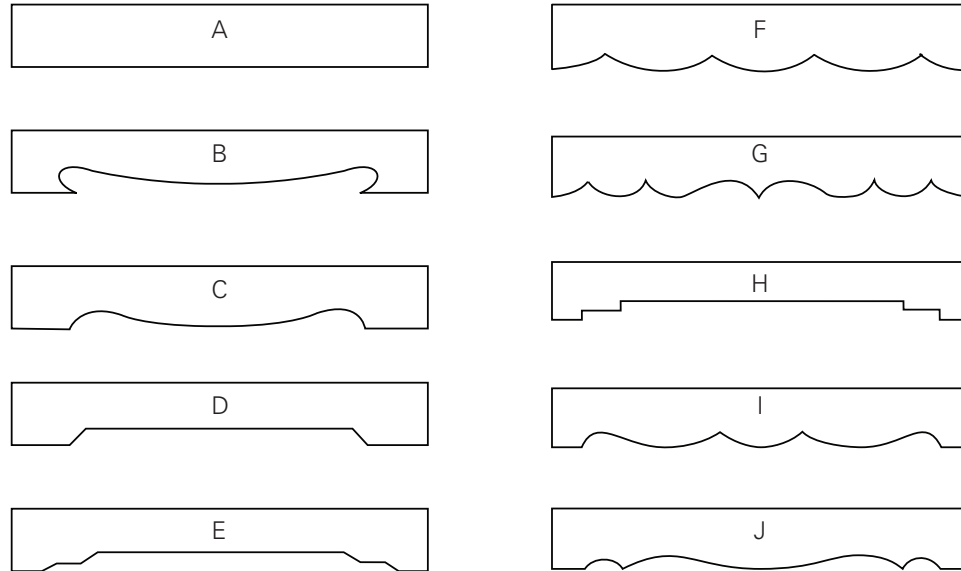

OPTIONS

- Decorative Banding
- Decorative Trim
- Board Mounting
- Velcro Mounting (if removal for cleaning is desired)

Cornices

There are ten cornice styles available to frame the top of the window and conceal any window covering hardware.

Cornice Styles

FABRICATION DETAILS

- Padded-face standard (padding is 100% polyester fiber fill)
- Dust cap and returns composed of 0.75" wood
- Construction features self-welting on top and bottom edge of cornice
- Inside and top surface of cornice covered with white lining
- Styles B, C, and J not recommended for lengths over 75"
- Solid fabrics and fabrics without a directional pattern are railroaded to eliminate seams
- Standard mounting system is aluminum angle brackets

NOTE

- All specified fabrics must meet NFPA 701 fire rating requirements
- Hunter Douglas Hospitality uses COM except for specified brand standards

SIZING

- Please specify the width of outside mounted cornices
- Returns
 - Typically 9" for two treatments at the window (sheer+drapery)
 - Typically 11" for three treatments (sheer+drapery+side panels)
 - May vary per project, please specify
- Height of a valance - typically 14" to 16", please specify per project

INSTALLATION

- Ceiling Mount (no dust cap required)
- Wall Mount (dust cap required)

OPTIONS

- Banding may be added to styles A, D, and H
- Trim options and contract welting are also available

Shower Curtain (Grommet Top)

Our standard shower curtain is grommet top but custom variations are available upon request.

FABRICATION DETAILS

- Curtain fabricated to size specification within 0.5" in length and 1" in width
- Fabric pattern matched according to commercial standards
- Multiple width drapery is overlock stitched with half widths placed on the return side of the drapery
- Side hems are blind stitched

NOTE

- Liners, rods, and hooks are not included (please order separately)
- All specified fabrics must meet NFPA 701 fire rating requirements
- Hunter Douglas Hospitality uses COM except for specified brand standards

GROMMETS

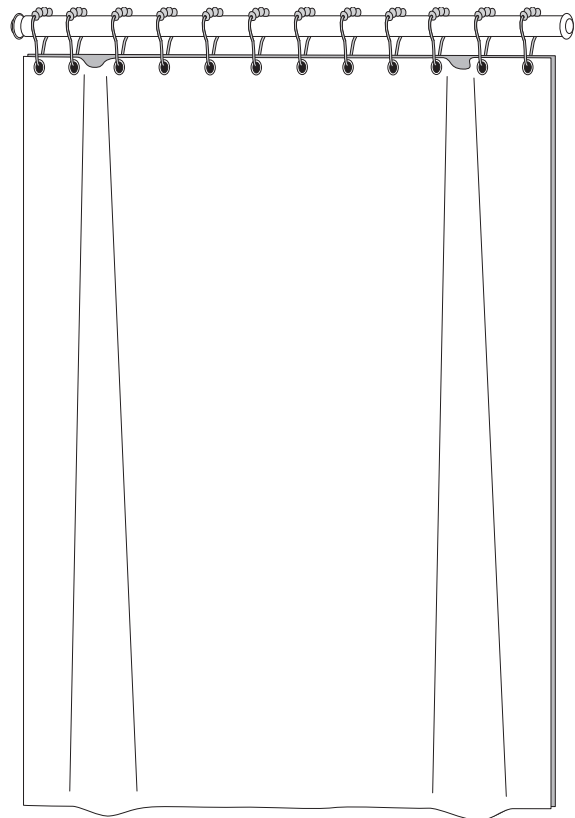

- Attached to top hem at 6.5" on center intervals beginning 1.25" from edge of curtain (i.e. 12 grommets in 72" wide curtain)
- Standard grommets are nickel plated brass to resist corrosion and rust (others available)

SIZING

- Standard size is 72"W x 72"H
- Typically fabricated at 120% of opening width

OPTIONS

- Custom design available, including sheer banding at top

Roman Shades

Roman Shades

The clean look and classic construction of roman shades allow for an array of customization.

FABRICATION DETAILS

- Soft-Fold Fullness: 200%, 250%, or 300%
- Unlined, privacy-lined, 2-pass and 3-pass blackout-lined shades are available
- Pleat sizing can be adjusted to match fabric repeats, please specify vertical and horizontal repeat, width of roll, fabric direction, and face

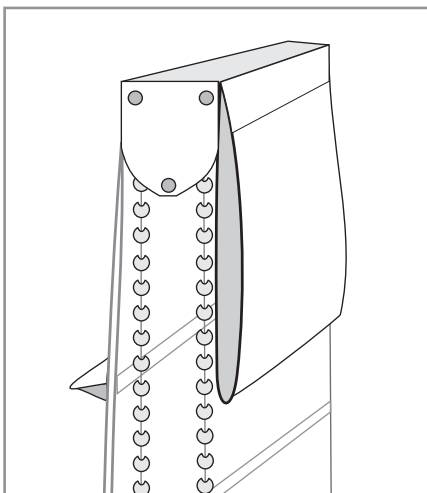

NOTE

- Customers need to verify that the provided fabric is suitable for a roman shade
 - Some shiny, stiff, or heavy fabrics will not fold correctly and thus will not work for roman shades
 - Sample shades are recommended when railroading is desired
- All specified fabrics must meet NFPA 701 fire rating requirements
- Hunter Douglas Hospitality uses COM except for specified brand standards

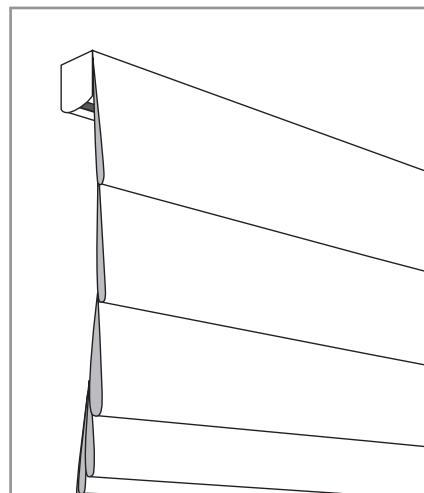

STYLES

- Flat Back-Pleated Shades
 - Constructed so the fabric gathers behind the shade as it is raised, maintaining a neat, flat appearance
 - Cords run through grommets for maximum durability
 - Allows close mounting to the window when the lifting mechanism is placed in front of the panel
- Soft-Fold Shades
 - Curving fabric folds are created by hobbling the face fabric to the lining
 - Highlights the draping quality of the fabric
- Custom Shades
 - Constructed with rings attached to the fabric
 - Recommended for public areas
 - Other styles of gathers, pleats, and rolls available (Fan, Balloon, Bottom Swag, Austrian)

Flat Back-Pleated
(panel shown back-mounted with valance)

Soft-Fold
(panel shown front-mounted)

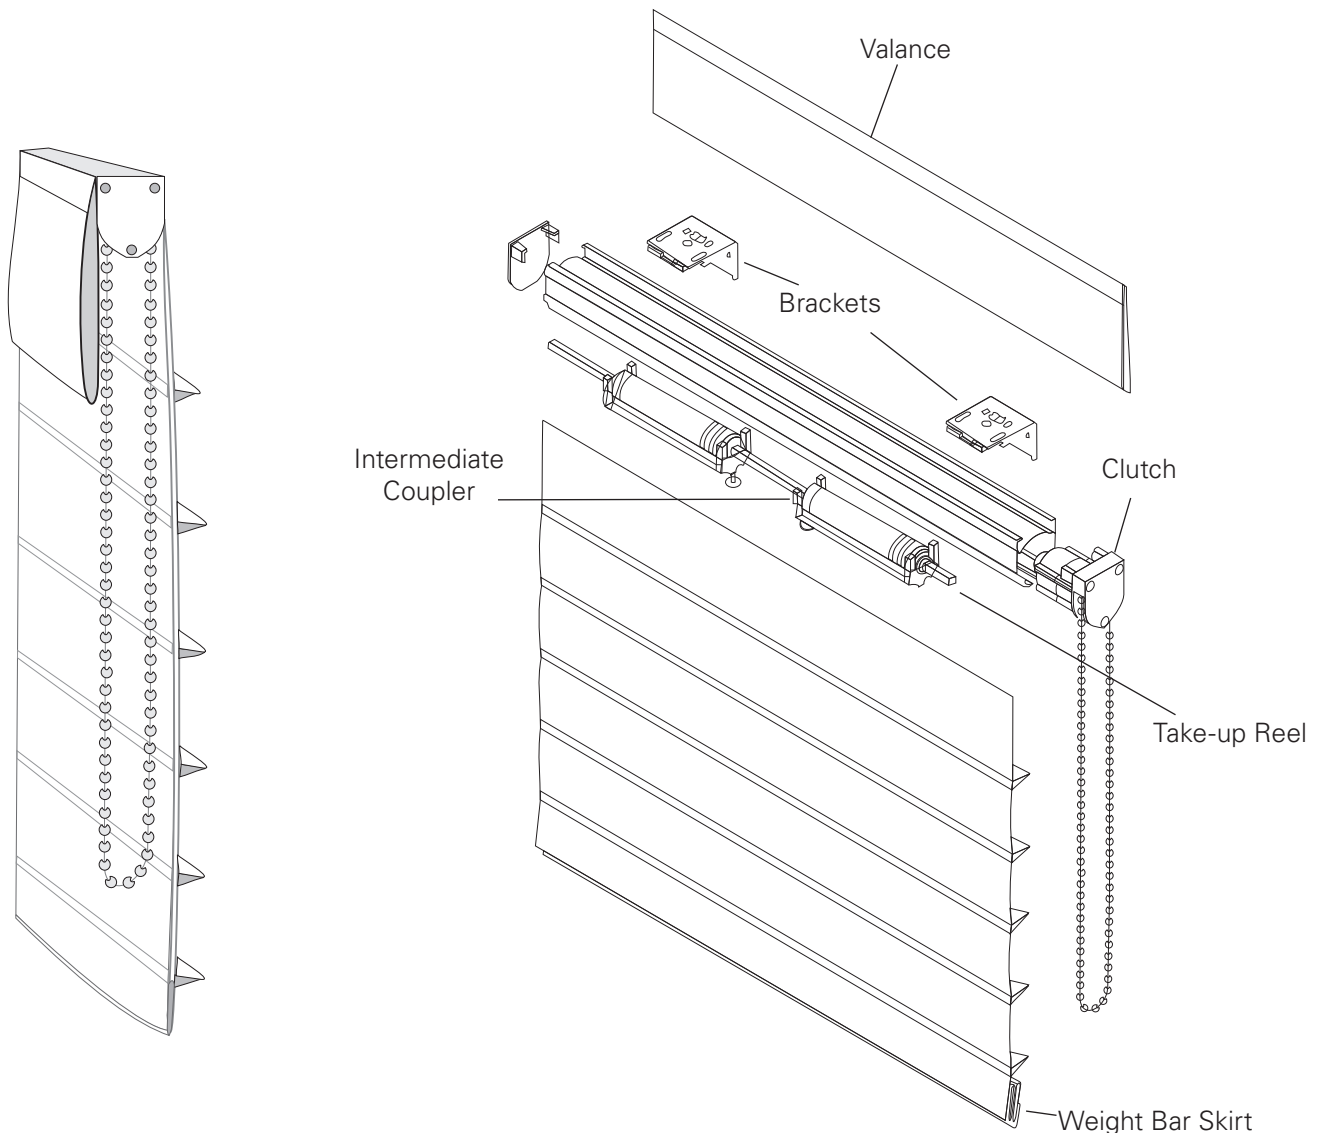

DRAW SYSTEM

- Lifting Mechanism Options
 - Extruded aluminum rail featuring a continuous-lift chain that allows the shade to be leveled on site without untying cords or an industry standard clutch system with take-up reels
 - Left or right positioning
 - Mounted in front of the panel, disguised by a valance for easy access or mounted behind the panel for a cleaner look
 - Stainless steel metal beaded chain (#10) standard (also available in nickel plated)
 - Motorization available; limited only by the characteristics of the fabric and the ability to transport to the location
- Clutch/brake system enables shade to stop and hold at any point
- Hold-down brackets secure chain to wall in compliance with ANSI standard for child safety (ANSI WCMA A100.1, Section 6.5)

AVAILABLE OPTIONS

- Fabric Valance
- Upholstered Cornice
- Decorative Banding, Trim and Fringe
- Inside, Outside, Ceiling, or Wall Mounting

Flat Back-Pleated Shade with Valance

Blackout Roman Shades

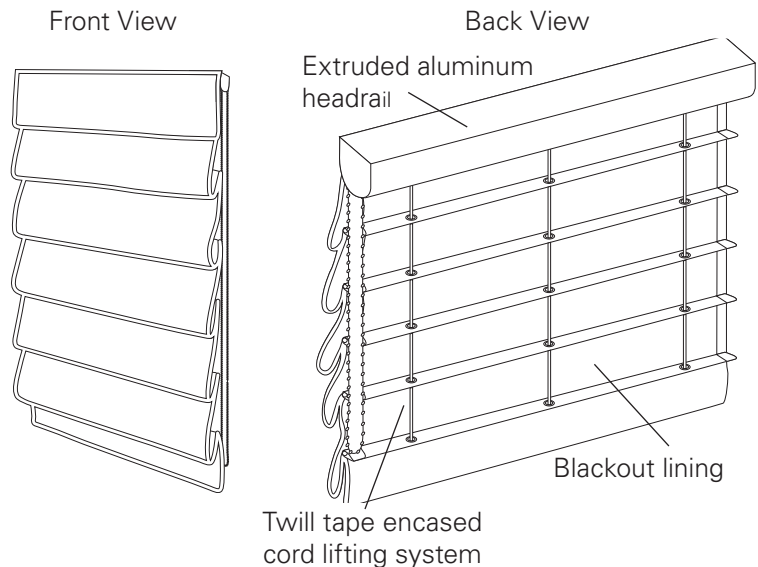

Blackout Roman Shades can be soft or flat fold styles. Please visit HDhospitality.com to see current fabrication collections or customers can provide their own material (COM). All specified fabrics must meet NFPA 701 fire rating requirements.

Classic Blackout

Roman shade with blackout lining.

FEATURES

- Single clutch and tube operating system with manual chain or motorized control options
- Pull cord or continuous cord loop lifting system
- Cord is encased in twill tape for added durability
- Passes ANSI/WCMA A100.1-2012 Safety Standard

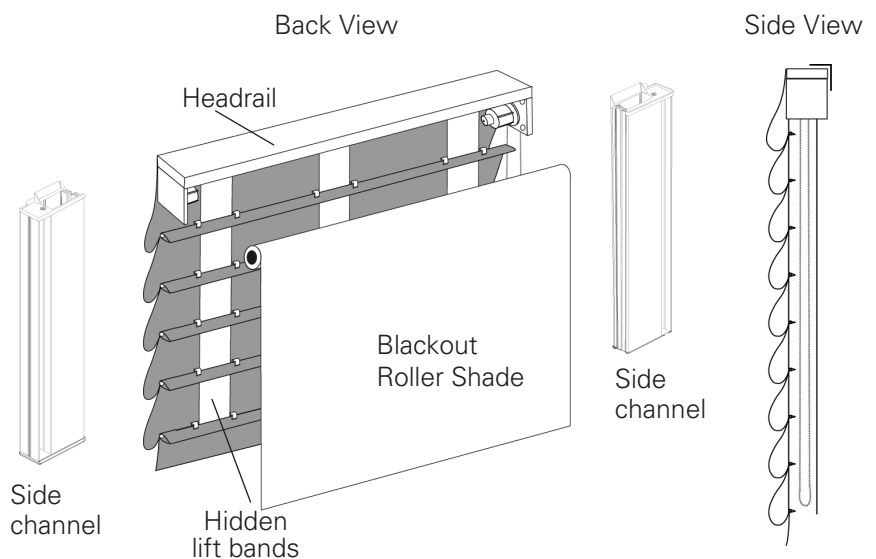

Classic Plus Blackout

Combines Classic roman shade with blackout roller shade lining.

FEATURES

- Roman shade and blackout roller shade raise and lower together with hidden lift bands
- Side channels for maximum light blockage
- Passes ANSI/WCMA A100.1-2012 Safety Standard

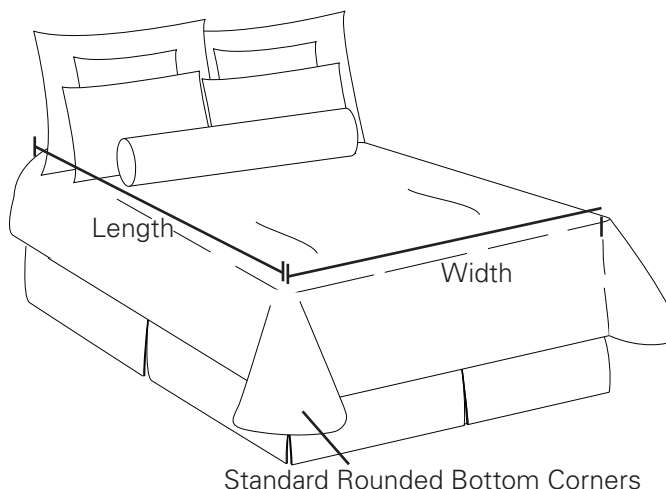

Bedding Specifications

Bedding Specifications

This section describes the components, fabrication process, and other elements of the bedding solutions we provide. We fabricate bedding in every style using COM including: duvet covers, coverlets, bedspreads, bed skirts, bed scarves, box spring covers, pillows, bolsters, and more.

Mattress Type	Mattress Dimensions
Full Extra Long	54"W x 80"L
Queen	60"W x 80"L
King	76"W x 80"L
California King	72"W x 84"L

Bedspread and Coverlet

STANDARD FABRICATION DETAILS FOR ALL BEDDING STYLES

- Square corners at top and rounded corners at bottom (square corners at bottom available upon request)
- Reinforced top stitch around perimeter with 0.5" stitches
- Pillow-cased edge
- Drop depth specified by customer:
 - Bedspread should extend to the floor
 - Coverlets are recommended to be three inches longer than mattress depth

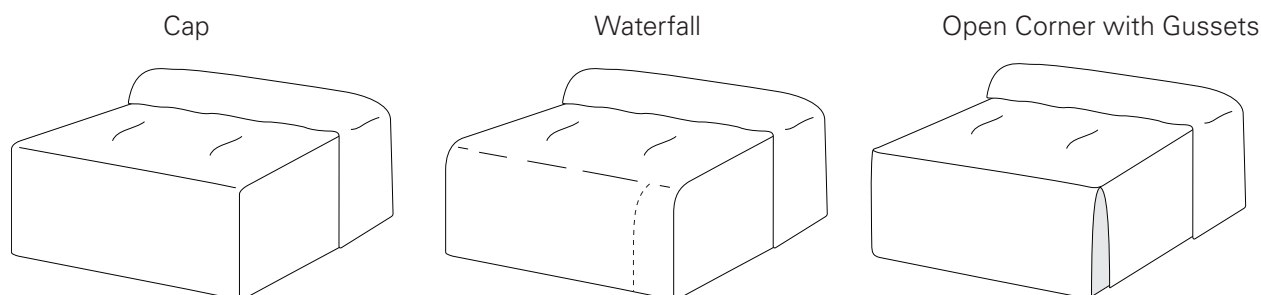

NOTE

- Hunter Douglas Hospitality uses COM except for specified brand standards

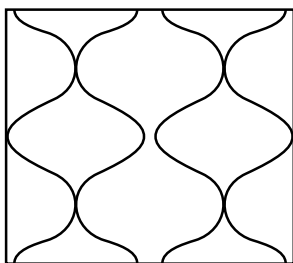

AVAILABLE BEDDING OPTIONS (additional lead times required)

- Pillow Tuck: 18" standard
- Bedspread Styles: cap, waterfall, or open corner with gussets available
- Edge Styles: flange, welting (matching or coordinating fabric), or banding (customer specified size)
- Quilting available with customer specified fill weight for 54" and 126" widths (see styles on following page)

Box
54" & 126"
3", 6" or 9" Repeat

Top Sheet

This unquilted protective cover can be self-lined, unlined, or lined with a contrasting fabric.

Duvet Cover

Duvet covers are versatile and easy to remove. They are generally self-lined and highly customizable.

OPTIONS

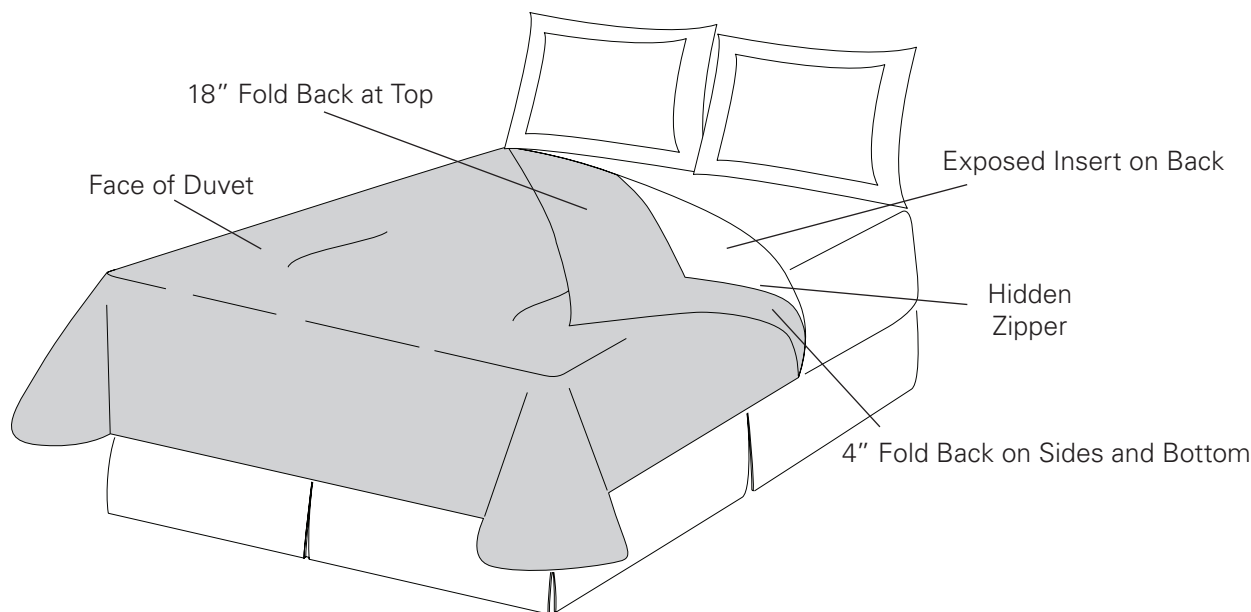

- Closures: zipper (standard), envelope, or buttons
- Decorative details are available upon request
- Reversible upon request

SmartZip Duvet Cover

This cost effective bedding treatment secures the duvet insert in place with a zipper to provide a clean crisp look, quick and easy changes, and eliminate sagging and shifting.

FABRICATION DETAILS

- Duvet insert with zipper included (customer to specify fill weight)
- Insert is fully covered on front and partially exposed on back

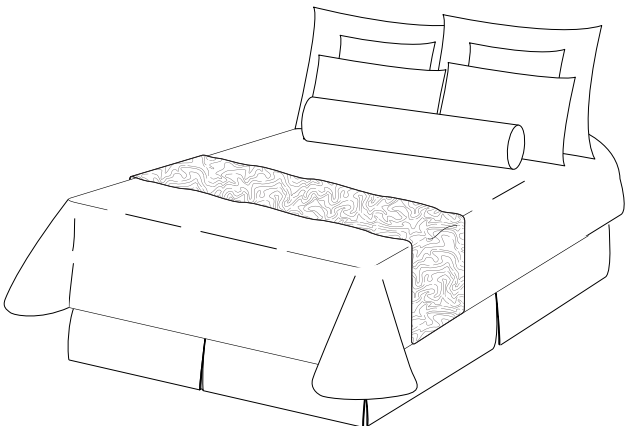

Bed Scarf

This decorative accessory adds interest to any bed.

FABRICATION DETAILS

- Available lined or unlined (double-sided print or reversible fabric is recommended for unlined)
- May contain 4 oz. fill or flannel as an interlining
- Edging Options: knife edge, roll edge, flange/mitered corners, or decorative trim/banding

Mattress Type	Standard Dimensions
Full	24"W x 80"L
Queen	24"W x 86"L
King	24"W x 102"L

Bed Skirts

Bed skirts provide a clean finished look to any bedding ensemble.

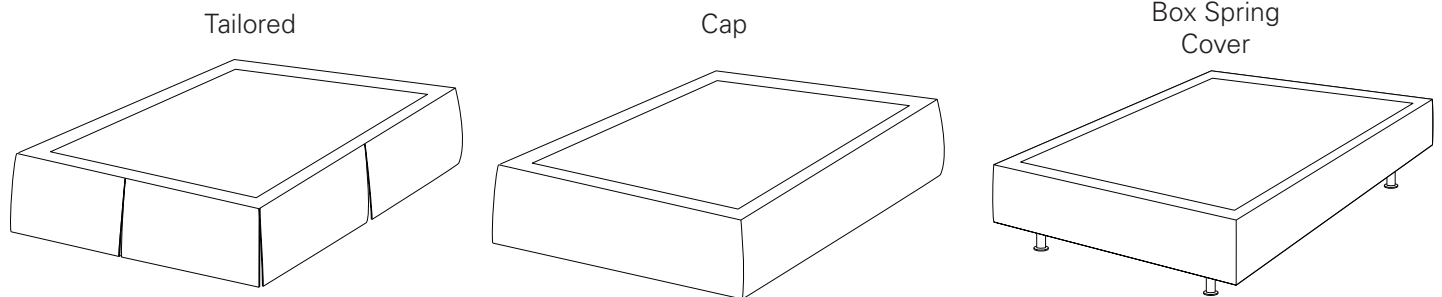

FABRICATION DETAILS

- Available in lined or unlined
- Standard 4" platform strip
- Platform (decking) fabric is composed of 70% Polyester, 30% Cotton Lining
- Drop depth specified by customer

STYLES

- Tailored: four pleats on Full, five pleats on Queen/King
- Cap: No pleats or split corners
- Box Spring Cover: 6" wrap at bottom of box spring with elastic at perimeter

Mattress Type	Mattress Dimensions
Full	54"W x 80"L
Queen	60"W x 80"L
King	76"W x 80"L
California King	72"W x 84"L

OPTIONS

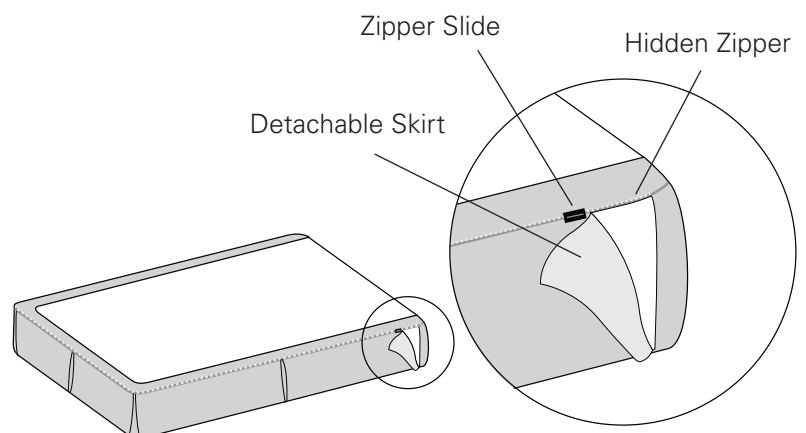

- 4" lip at head to secure skirt to box spring
- Hugger available on all option
- No-slip corners
- Box pleated skirts available upon request

SmartZip Bed Skirt

The SmartZip Bed Skirt is a quick and easy alternative to a standard bed skirt. By using a zipper to attach the skirt, removal is simple, allowing the skirt to be laundered or changed efficiently. The innovative design eliminates shifting and removes the need to lift the mattress resulting in reduced time, effort, and risk of injury.

FABRICATION DETAILS

- Hidden zipper on three sides
- Hugger style
- Skirt stay at corners
- Standard 4" platform strip
- Platform (decking) fabric is composed of 70% Polyester, 30% Cotton Lining
- Drop depth specified by customer

Pillow Shams

Using customer's own material (COM), Hunter Douglas Hospitality is able to fabricate a wide variety of pillow shams and bolsters to complement any top of bed design.

FABRICATION DETAILS

- Double stitching around edges (ten stitches per inch)
- Standard polyester thread in a matching/complementary color
- Closure Options: zipper (standard), or envelope

INSERTS AVAILABLE

- Polyester
- Poly-Cloud
- Feather Down

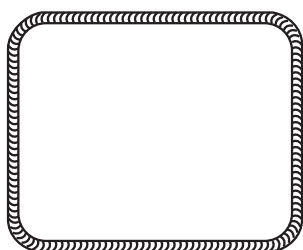

NOTE

- Inserts are lined with non-woven polyester fabric
